Cutting edge functional fashion has always been key. .I highly recommend this amazing product Mobile Device Pants Pocket, a jean or dress pants that adds style and great functionality for the cell that is a must for everyone whom lives on the go, a comfortable stylist jean with this special pocket and original design.

We would highly recommend it be produced for your line of everyday wear, it could be of massive appeal in the fashion industry.

I learn this US patent

Mobile Device Pants Pocket with it's natural contour of the body and the amazing design of how it fits your body, a must have.

It fit your mobile Device /Cell phone in the natural contour between the leg and the torzo, this gives full range of motion while standing, sitting, or bending over or even squatting to pickup something.

I saw the video presentation and was very impressed by this innovative design.

This takes stylish clothing and it combines comfort and function Designers need to put their creative talents to work to this very functional Mobile Device Pants Pocket on the market.

Sincerely Anabella de Corro
